EDUCATION

Self Learn

From 2020

Web Developement

I began my journey with frontend development, learning HTML, CSS, and JavaScript. After mastering these foundational languages, I applied my knowledge by building simple websites to solidify my skills. Once confident in the basics, I progressed to exploring frameworks and libraries to enhance my development capabilities.

Immaginazione e lavoro

2024-2025

Java FullStack

Currently studying Java Fullstack development, covering frontend technologies (HTML, CSS, JavaScript), database management, AWS, and Java programming. Additionally, completed a soft skills course focused on effective communication, teamwork, and interpersonal skills to complement my technical expertise.

Al-Amal High School

2021-2023

Science

Studied Physics with a focus on Mathematics for three years, gaining foundational knowledge in analytical problem-solving and logical reasoning.
